

MindManager Release Notes: February 24, 2009

MindManager 8 build 8.0.284, French and Japanese language release

MindManager 8 build 8.0.284 is not an update to build 8.0.235, English and German language release. It is a new build using the same code base as 8.0.235 localized for French and Japanese. Build 2.0.284 is intended only for users desiring to use French language in MindManager 8 and for purchasers of the Japanese version of MindManager 8.

MindManager 8 known issues:

Build 8.0.284 French:

Issue: Vista: The Web Services folder is empty after installing MM on Vista until you restart the application

Workaround: After installation of MM 8, Restart the application once.

Issue: Web Services: MySpace web part pointing to English authorization page

Workaround: The language will need to be changed using settings at the bottom of the MySpace authentication page.

Issue: Missing localization in Outline View Printing window font Format

Workaround: None. The Format options in the Outline View print dialog options are in English only.

Issue: Template Organizer: Style and Template folder titles are not localized

Workaround: None. Folder names for Templates and Styles in the Template Organizer are English only.

Issue: "Sample Database" map is not translated

Workaround: None: Topics except for Central topic in Sample database map are English only.

Issue: **Cannot create RSS feed**

Workaround: [See knowledge base article on Mindjet.com.](#)

Issue: **English appears on various areas in the product**

Workaround: None. Some areas of build 8.0.284 are not localized in French. These areas may include: Welcome map, What's New map, Web Services/Web Parts, others.

Issue: **Web Services- Search: Amazon.com: No result returned when search contains extended ascii characters**

Workaround: None. Searching using keywords with extended ascii characters, i.e. "é", may have inconsistent results.

Issue: **Web Services: after logging in Facebook --> the message is in English**

Workaround: None. This message is controlled by the Facebook after login page.

Build 8.0.284 Japanese:

Issue: **Vista: The Web Services folder is empty after installing MM on Vista until you restart the application**

Workaround: After installation of MM 8, Restart the application once.

Issue: **"Sample Database" map is not translated**

Workaround: None: Topics except for Central topic in Sample database map are English only.

Issue: **eBay uses a different brand for their web service in the Japanese market**

Workaround: None. The eBay web service in MindManager 8 will take users to ebay.co.jp.

This site is operated by an eBay partner and not eBay.

Issue: **Instant Meeting panel shows “?” for user name, MM Workspace window and MM chat application.**

Workaround: None. The current Instant meeting UI does not support Unicode at this time.

Issue: **MindManager Web crash may result in English error message: “Invalid Moderator token.”**

Workaround: None. Crash issues should be fixed, however error messages are English-only.

Issue: **Select New Style for Current Map dialog shows some map descriptions in English.**

Workaround: None. Some maps from format -> Map Style -> Assign from Template Organizer are English Only. These maps are: Corkboard, Blueprint, Layout-Curved Right Map, or Mindjet maps

Issue: **Character corruption pasting hyperlink as formatted text.**

Workaround: None.

Issue: **Mindjet Player: Cannot view JA swf files in IE6 and 7. English, French or German Flash Player 9 and 10 on English system with JA maps result in blank page when .swf viewed on IE6 and IE 7.**

Workaround: Rename .swf files to non Japanese characters

Issue: **Cannot create RSS feed**

Workaround: [See knowledge base article on Mindjet.com.](#)

Issue: **English appears on various areas in the product**

Workaround: None. Some areas of build 8.0.284 are not localized in Japanese. These areas may include: Welcome map, What’s New map, Web Services/Web Parts,

others.

Issue: **Notes: MindManager 8 crashes after trying to save a document with hyperlinks in notes and then trying to open the document**

Workaround: None.

Issue: **Notes: MindManager 8 crashes when using pack and go for a map with a hyperlink to a JP local map in notes**

Workaround: None.

Issue: **Notes: crash: "parameter is incorrect" error when saving a map with a new name if bulleted notes in Japanese have been imported from MS Word.**

Workaround: None.

Issue: **Notes: Can't open file as hyperlink in notes if file name use Asian language characters.**

Workaround: None.

Issue: **Notes: using on Korean OS with Korean language installed creates bad characters where indents or spaces exist.**

Workaround: None.

Issue: **Notes: MindManager 8 crashes exporting to Pack & Go while having one or more hyperlinks in notes**

Workaround: None.

Issue: **Notes: Possibility that hyperlink to document named with Japanese characters entered in notes will corrupt these characters.**

Workaround: None.
